## Scope and Contents

The Osborn Manuscript Files contain single, unbound manuscripts and small groups of manuscripts acquired for the Osborn Collection which the Library has chosen to describe in finding-aid style lists rather than as discrete entries in Yale University Library's on-line public access catalog (ORBIS). The materials in the Osborn Manuscript Files include literary and historical manuscripts, individual and small groups of letters, and single documents, as well as some "Unprocessed" material such as engraved portraits and bibliographic information.

Materials described in the Osborn Manuscript Files lists are grouped as follows:

OSB MSS FILE # 1 - 16660 are arranged alphabetically under headings for author or other closely related personal or corporate name. Items of unidentified authorship are listed by title or topic.

OSB MSS FILE # 16601 and higher are listed in the order cataloged.

Catalog records for other materials in the Osborn Collection, including archival collections and manuscripts in bound format, can be found in ORBIS.
