Preferred Citation

Sylvanus Dyer Locke Papers (MS 327). Manuscripts and Archives, Yale University Library.

Biographical / Historical

Sylvanus Dyer Locke was born in Otsego County, New York on September 11, 1833. In 1870, while working for the Walter A. Wood Mowing and Reaping Machine Company of Hoosick Falls, New York, Locke succeeded in building an automatic reaper and binder. Locke served one term in the New York state legislature (1883-1885). He was also the inventor of a train car coupling device and a machine for manufacturing detachable steel link belting. Locke died in 1896.

Scope and Contents

The Sylvanus Dyer Locke Papers consist of correspondence, letterbooks, patents, and printed material which document the last twenty years of Sylvanus D. Locke's life in Hoosick Falls, New York, and relate primarily to his inventions, particularly his self-binding harvester and his detachable steel link belting. Correspondents include attorneys, patent examiners and solicitors, and other manufacturers of farm equipment and heavy machinery. Some material also concerns Sylvanus D. Locke, Jr. and the Locke Steel Chain Company of Bridgeport, Connecticut.

The papers, which the Yale Library purchased in 1964, are arranged in three series:

- I. LETTERPRESS COPYBOOKS, 1877-1893
- II. GENERAL CORRESPONDENCE, 1875-1917
- III. TOPICAL FILES, 1859-1942

The papers date from 1859 to 1942 but the bulk of the material is business correspondence of Sylvanus Locke from 1876 to 1896.

Series I contains nine volumes of Sylvanus Locke's "private" letterbooks, which include both outgoing business and family letters dating from 1877 to 1893. The letters begin several years after Locke had secured a patent for his automatic reaper and binder. Business correspondence focuses on the protection of this patent from infringement by manufacturers of farm machinery such as the H.M. McCormick Company. Correspondents include patent examiners and solicitors such as J.G. Parkinson. Some correspondence concerns Locke's other inventions. There are also letters to Locke's brothers, wife, and children and letters concerning domestic bills, medical treatments and expenses, and the children's education. Indexes in the letterpress volumes serve as a guide to correspondents in both Series I and II.

Series II contains Locke's incoming correspondence from 1876 to 1877 and from 1887 to 1896. Correspondents and subjects included in Series II are similar to those in Series I. Many incoming letters filed under 'L' relate to the Locke family. For the years 1893 to 1896 the series also includes copies of

Locke's outgoing letters. Correspondence after 1896 relates to Sylvanus Locke, Jr. and the Locke Steel Belt Company. This correspondence is, however, fragmentary. Series II also contains numerous bills and receipts of the Locke family. At the end of the series are several folders of similar correspondence which is unarranged and marked "Miscellaneous." The series concludes with two boxes of incoming and outgoing telegrams mounted in volumes.

Series III is composed of printed material, photographs, and memorabilia, the majority of which relates to Sylvanus Locke and his inventions. The largest quantity of material is in the folders "Patents," which contain printed copies of Locke's patents for his inventions as well as patents of others for similar devices. The printed material includes advertising circulars, sales catalogues, and price lists for harvesting machinery. Also in these folders are printed legal documents relating to patent litigation in Locke's behalf and writings by Locke including a description of his automatic car coupler. An address delivered by Locke before the New York State Assembly (folder 176) is one of the few documents in the papers relating to Locke's term in the New York legislature.

Arrangement

Arranged in three series and three additions: I. Letterpress Copybooks, 1877-1893. II. General Correspondence, 1875-1917. III. Topical Files, 1859-1942.

Accession 2019-M-0041: Additional Material, 1855–1896

This accession comprises correspondence and financial records of Sylvanus Dyer Locke related to his patents and use of machinery.

Correspondence

The material is arranged as received by the donor, generally chronologically and therein roughly alphabetically by name of sender, with some exceptions. For material that falls outside the alphabetical scheme, processing staff maintained original order for the material and made no attempt to refile it.

Alphabetical letter books

Letter books were previously housed in binders, which were disassembled during processing. Information taken from the spines of the binders is reflected in the folder titles. Some letter books with letters adhered to the spine have not been disassembled and remain as received from the donor.
